### **PROJECTS**

Courseshare, Full Stack (courseshareapp.com)

March 2022 – April 2022

- Designed and developed a full-stack web application for creating online courses and tutorials with an intuitive user interface.
- Implemented a responsive, mobile-friendly frontend model utilizing TypeScript, React, and SASS.
- Built an extensive RESTful backend server using NodeJS and Express routing to handle user authentication and data management with MongoDB.
- Deployed the frontend portion of the application via Netlify and hosted the backend server on a DigitalOcean virtual machine (Droplet).

**Contrast**, Frontend (contrast.herokuapp.com)

February 2022

• Designed a responsive web application that serves as a diff tool that enables users to visualize two samples of text side by side and identify textual differences between the two.

### WORK EXPERIENCE

**Project Lever**, Admissions Consultant - Boston, MA

September 2021 – Present

• Provided individualized consultations to students and families preparing for college admissions and standardized exams.

Yale University, Research Associate - New Haven, CT August 2019 – September 2021

• Investigated and published statistically driven data analyses of protein localization in *C. elegans*.

### **EDUCATION**

Yale University, New Haven, CT Molecular Biology (B.S.)

September 2015 – May 2019

## **TECHNICAL SKILLS**

**Programming Languages:** JavaScript(ES6)/TypeScript, HTML5/CSS, Ruby, Python **Frameworks and Libraries:** React, Redux, Express, NodeJS, SASS/SCSS, Jest

Databases: MongoDB, PostgreSQL

Tools: Git, Netlify, DigitalOcean, Postman
